

## Note

The following Table provides traffic trend information derived from a small sample set of traffic counters located on the national road network.

The information below covers the morning period from 7am until 10am. The trend for car traffic from this period of the day generally correlates closely with the overall daily trend in car traffic at each location.

This summary is produced daily.

 <b>Transport Infrastructure Ireland</b> <b>National Road Car Traffic Report</b> <b>Morning Period (7am – 10am)</b>			
<b>Thursday 4<sup>th</sup> June 2020</b>			
<b>Traffic Counter</b>	<b>Traffic Volume (Cars Only)</b>	<b>Comparison with same day 2019</b>	<b>Comparison with same day last week</b>
M50 J6-J7 (N3 Navan Road to N4 Galway Road)	13,372	-52%	+4%
M1 North of J20 (South of Border at Jonesboro)	1,543	-58%	+10%
M1 J2-J3 (Dublin Airport to Swords)	10,747	-43%	+5%
M4 J6-J7 (Between Celbridge and Maynooth)	5,880	-41%	+2%
N6 Bóthar na dTreabh, Galway	2,602	-43%	+4%
M7 J29-J30 Limerick SRR (Ballysimon to Rosbrien)	4,336	-51%	+1%
N7 J3-J4 (Citywest)	10,091	-46%	+5%
M9 J11-J12 (Mullinavat to Waterford)	1,157	-51%	+3%
M11 J5-J6 (Between Bray North and Bray Central)	6,583	-52%	+2%
N40 Cork SRR (Kinsale Road to Douglas)	9,554	-46%	+4%

### **Introductory Remarks**

- In the initial three weeks following the introduction of the March 27<sup>th</sup> restrictions, traffic volumes were very consistent. Overall traffic volumes were typically down approximately 65-70% across the national road network.
- From Tuesday 21<sup>st</sup> April, an upward trend in car traffic volumes became apparent.
- In response, daily traffic figures are being provided in order to more closely monitor the trends. Traffic figures are measured from 7am to 10am so as to provide an early indicator each day.
- Weekly heavy goods vehicle traffic has remained largely stable and accordingly the daily figures provided are for cars only.
- The changes day-to-day are not cumulative – they compare only the current day's figures versus the same day in the previous week and the same day last year.

### **Daily Data for Thursday 4<sup>th</sup> June**

- The increase in car traffic volumes today as compared with Thursday 28<sup>th</sup> May is lower than has been the case in recent weeks. This continues the slow-down in car traffic growth evident so far this week.
- Overall, car traffic today is typically down by between 41% and 58% of the volumes of one year ago, across the sampled traffic counters.
- Car traffic just south of the Northern Ireland Border on the N1 at Jonesboro is up 10% today as compared with Thursday 28<sup>th</sup> May. This counter has the greatest reduction in traffic of all the sample counters as compared with one year ago.
- Car traffic volumes on the radial routes into Dublin show an increase this morning as compared with Thursday of last week of between 2% and 5%. Car traffic is up 5% on the M1 at Swords to Airport, 5% on the N7 at Citywest, 2% on the M4 at Celbridge-Maynooth and 2% on the M11 at Bray. These growth figures are substantially below the figures experienced last week.
- The M50 (N3 Navan Road to N4 Galway Road) shows a 4% increase as compared with Thursday 28<sup>th</sup> May. This continues the trend of lower car traffic growth rates this week on the M50 as compared with previous weeks and is consistent with the lower growth rates recorded today on the radial approach routes.
- In the case of the regional cities the increase in car traffic volumes this morning as compared with Thursday 28<sup>th</sup> May is as follows: N6 Bóthar na dTreabh Galway 4%, N40 Cork 4%, M9 Waterford 3% and M7 Limerick 1%. These figures indicate lower growth rates as compared with recent weeks and are similar to the rates experienced in the Dublin region today.

As a general conclusion, this morning's increase in car traffic across the sample traffic counters continues this week's trend of lower growth than has been experienced in recent weeks.
