

Note

The following Table provides traffic trend information derived from a small sample set of traffic counters located on the national road network.

The information below covers the morning period from 7am until 10am. The trend for car traffic from this period of the day generally correlates closely with the overall daily trend in car traffic at each location.

This summary is produced daily.

			
Transport Infrastructure Ireland			
National Road Car Traffic Report			
Morning Period (7am – 10am)			
Wednesday 23rd September 2020			
Traffic Counter	Traffic Volume (Cars Only)	Comparison with same day 2019	Comparison with same day last week
M50 J5-J6 (N2 to N3 Navan Road)	18,627	-21%	-3%
M1 North of J20 (South of Border at Jonesboro)	2,620	-24%	-4%
M1 J2-J3 (Dublin Airport to Swords)	14,940	-18%	-4%
M4 J6-J7 (Between Celbridge and Maynooth)	7,950	-20%	-6%
N6 Bóthar na dTreabh, Galway	3,751	-25%	-3%
M7 J29-J30 Limerick SRR (Ballysimon to Rosbrien)	7,443	-25%	+3%
N7 J3-J4 (Citywest)	14,066	-28%	-8%
M9 J11-J12 (Mullinavat to Waterford)	1,847	-27%	0%
M11 J5-J6 (Between Bray North and Bray Central)	10,995	-25%	-7%
N40 Cork SRR (Kinsale Road to Douglas)	14,264	-21%	0%

Introductory Remarks

- From Tuesday 21st April, an upward trend in car traffic volumes became apparent. In response, daily traffic figures were provided by TII from 29th April in order to more closely monitor traffic trends. Traffic figures were measured from 7am to 10am so as to provide an early indicator each day.
- Weekly heavy goods vehicle traffic had remained largely stable and accordingly the daily figures provided were for cars only.
- The changes recorded day-to-day are not cumulative – they compare only the current day’s figures versus the same day in the previous week and the same day last year.
- By mid July car traffic figures had plateaued, with little day-to-day change, and as of Tuesday 21st July TII moved from the practice of providing daily updates of car traffic volumes during the morning peak period of 7-10am to a weekly update for each Tuesday in which we compared the full day traffic volumes with the previous Tuesday’s volumes and with the equivalent Tuesday in 2019.
- Given the potential traffic impacts arising from the introduction of Level 3 restrictions in Dublin on 19th September TII is providing a daily update on morning peak traffic figures commencing 21st September.

Daily Data for Wednesday 23rd September

- Overall, car traffic today is typically down by between 18% and 28% of the volumes of one year ago, across the sampled traffic counters.
- Car traffic just south of the Northern Ireland Border on the N1 at Jonesboro shows a decrease today of -4% as compared with Wednesday 16th September.
- Car traffic volumes on the radial routes into Dublin are slightly down when compared with Wednesday of last week. Car traffic is down -4% on the M1 at Swords to Airport, -6% on the M4 at Celbridge-Maynooth, -7% on the M11 at Bray and -8% on the N7 at Citywest. These decreases may reflect the impact of the Level 3 restrictions introduced at the weekend and are very similar to yesterday’s figures.
- The M50 (N3 Navan Road to N4 Galway Road) shows a -4% decrease in car traffic as compared with Wednesday 16th September. This is consistent with the reduced level of car traffic recorded today on the radial routes, in particular the M1.
- In the case of the regional cities the change in car traffic volumes this morning as compared with Wednesday 16th September is as follows: M7 Limerick +3%, N40 Cork 0%, M9 Waterford 0% and N6 Bóthar na dTreabh Galway -3%.
- Overall today’s car traffic figures indicate a reduction in car traffic volumes during the morning peak in Dublin but with more modest levels of decrease evident at the regional city counters. Results are similar to yesterday’s figures.
