

## Note

The following summary Table, produced daily, provides traffic trend information derived from a small sample set of traffic counters located on the national road network.

The information below covers the morning period from 7am until 10am. The trend for car traffic from this period of the day generally correlates closely with the overall daily trend in car traffic at each location.

### **Introductory Remarks**

- From Tuesday 21<sup>st</sup> April, an upward trend in car traffic volumes became apparent. In response, daily traffic figures were provided by TII from 29<sup>th</sup> April in order to more closely monitor traffic trends. Traffic figures were measured from 7am to 10am so as to provide an early indicator each day.
- Weekly heavy goods vehicle traffic had remained largely stable and accordingly the daily figures provided were for cars only.
- The changes recorded day-to-day are not cumulative – they compare only the current day's figures versus the same day in the previous week and the same day last year.
- With the introduction of countrywide Level 3 restrictions from midnight on Friday 9<sup>th</sup> October, TII has again reverted to providing a daily update.
- From Friday 16<sup>th</sup> October, following the introduction of Level 4 restrictions in the border counties of Cavan, Monaghan and Donegal, counters close to the border on the N2, N3, N13, N15 and N16 have been added.

### **Daily Data for Wednesday 28<sup>th</sup> October**

- Overall, car traffic today is typically down by between -32% and -63% of the volumes of one year ago, across the sampled traffic counters. Today's car traffic reductions are likely to be in part impacted by the school mid-term.
- Car traffic just south of the Northern Ireland Border on the N1 at Jonesboro shows a decrease today of -63% as compared with Wednesday 21<sup>st</sup> October and by -50% since the start of the Level 3 restrictions on 5<sup>th</sup> October.
- In the case of the non-motorway border counter sites, traffic volumes today vary by between -4% and -21% as compared with Wednesday of last week and by between -32% and -44% since 5<sup>th</sup> October. It should be noted that traffic volumes at the N2, N3, N14, N15 and N16 counters are lower than at the motorway traffic counters and are likely to display wider fluctuations in traffic figures.
- Car traffic volumes on the radial routes into Dublin this morning generally show a marked decrease as compared with Wednesday of last week. Car traffic is down -18% on the N7 at Citywest, -24% on the M1 at Swords to Airport, -27% on the M4 at Celbridge-Maynooth and -31% on the M11 at Bray.
- The M50 (N3 Navan Road to N4 Galway Road) shows a -20% decrease as compared with Wednesday 21<sup>st</sup> October. This reflects the general decrease in peak time car traffic volumes on the radial approaches to the city.
- In the case of the regional cities there is a marked decrease in car traffic volumes this morning as compared with Wednesday 21<sup>st</sup> October. The Traffic volume changes are as follows: M9 Waterford -21%, N6 Bóthar na dTreabh Galway -24%, N40 Cork -28% and M7 Limerick -31%.
